

UNIVERSITY OF
SURREY

Engagement with Easthampstead Park

Throughout the 2018 - 2019 academic year students across KS3, KS4 and KS5 will have the opportunity to meet discuss and learn about University life from students and lecturers

DESIGN,BUILD and RE-USE Challenge

This workshop is designed to be delivered in school to students within KS3. Working in teams, students design, build and test various structures in a bid to win a construction contract. However, each team must work to make a profit, emphasising the importance in planning as all materials available to them will work against their revenue.

Blending engineering with business, this workshop appeals to students who enjoy problem solving and competition
