What is an Apprenticeship?

- ∞ Last year in England over 250,000 workplaces employed an apprentice
- ∞ An apprenticeship gives you hands-on experience, a salary and the opportunity to train while you work. All of this with some high quality, prestigious companies in loads of different industries.
- ∞ An apprenticeship is a real job. It's a way to:
 - ∞ Earn a wage and learn at the same time, with at least 20% of your time set aside for learning – normally at a college, university or other training provider.
 - ∞ Gain official certification of your skills, equivalent to a qualification ranging from level 2 (GCSE equivalent) up to degree level.
 - ∞ Start a long-term career path with the possibility of higher earnings.
 - ∞ By successfully completing your apprenticeship, you'll have gained the confidence and skills needed to progress in your chosen career. Apprenticeships are available across a wide range of industries and organisations, from local businesses to large national brands.
